**BMaddox Enterprises v. Oskouie, et al., No. 17-CV-1889**

Dear Judge Abrams,

I am writing to inform the court that I have become aware that Mr Maddox is, at the very least, attempting to evade and frustrate the enforcement of the Australian judgement from the Supreme Court of NSW, as I referred to in my previous letter (ECF 174).

Attached is a screenshot from his publicly accessible Facebook page. Mr Maddox makes it unequivocally clear that his intention is to avoid and frustrate the Australian judgement by declaration in the Facebook posting (see Figure 1 attached)

He has challenged the Plaintiff in the Australian case, mistakenly believing that avoiding travel to Australia will frustrate the judgement.

It appears he has done the above publicly because he believes that he will not face any consequences regarding his action which have been described by Special Agent Matthew Miller FBI as "extremely disturbing" or, in the alternative, that the attempt to collect the judgement will inevitably fail and that he will have little trouble in fending off any attempts.

This is an ongoing pattern for licensed gun dealer Mr Maddox.

Previously, Mr Maddox has blatantly attempted to use criminal means to disrupt my business and personal life. Specifically, he tried to recruit hackers from Russia and the rest of Asia via a freelance recruitment service (screenshots supplied as verified by FBI Agent Matthew Miller of the Sioux Falls branch office) to "take down" my competing website and manufacture evidence in an effort to make me look guilty because "attorneys are too expensive and time consuming". These actions were even conceded by Mr Maddox' counsel in ECF 56 at page 26 of 28 as being "...Brandon exploring his options and perhaps out of his depth".

Thanks for the response. Yes, my website <FFL123.com> was hacked. They changed the index page to "no follow" for google indexing, took me 30 days to discover. They logged into my hosting control panel and downloaded all files and changed logo and uploaded to ffltrust.com, they now promote via google adwords. Suggestions to resolve this issue? I hired www.dnca.com but they have no guarantee on how to resolve.

Hi Brandon,  
Thanks for your response. First I can secure your website to make sure it won't get hacked again, then we can take some actions against those who stole your content. Please add me on skype at: rabulislam304 so that we can discuss further and make a decision.

Thanks,  
Rabul

**Brandon Maddox**  
Hey Rabul I have a new website going live any day. This will be on a new server and should be more secure. I have developers already almost done with this project. Possible to hire you to focus efforts on getting ffltrust.com removed? I think google adwords are down, do I need to hire attorney? Best options to remove content from the ffltrust.com? I have legal ownership https://www.fll123.com/FFL123.com\_copyright.pdf  
\*google adwords seems to be gone

**Rabul Islam**  
Yes, you can hire attorney and I can put together the evidence for you and guide the attorney. However, it might take more time to do that. Apart from that, I can also hit and down ffltrust.com if you want.

**Rabul Islam**  
so at this point, what do you want me to take care of. Shall I take down the site or only help your attorney to file the case before securing the site/server?

**Brandon Maddox**  
Developers are in Vietnam... https://www.elance.com/s/codeandmore/ and the testers who test before going live are in Russia... https://www.elance.com/s/wedooa/

Attorney maybe expensive and time consuming. Too many other countries involved. If google adwords is gone as a tool to promote, maybe we have time.  
I work to get website ready for live and then have you review server?

**Rabul Islam**  
I will take down the site for a few times until they don't take down your content. We hit the fake site.

**Brandon Maddox**  
okay  
I better go to bed. Any idea where they are from?  
Seen anything like this before?

**Rabul Islam**  
Just for the information, vulnerability assessment on any web application takes about 40+ hours and fixing depends on the findings, vulnerability assessment+ fixing findings on the server: about 30+ hours. Take down any domain online: \$1000 excluding upwork fees. I can give you a discount with the rate of \$55.56 including upwork fees.  
yes, seen many times. Can't tell where they are from without investigating further

**Brandon Maddox**  
okay, you think do 70 hrs of work before going live?

**Rabul Islam**  
Yes, that will confirm it's security on both server and web app side

**Brandon Maddox**  
okay, we shall talk tomorrow sir.
